AUTHOR Ellsworth, Randolph A.; Franz, Carleen
TITLE Bibliography on Criterion Referenced Measurement.
PUB DATE Oct 75
NOTE 24p.

EDRS PRICE MF-$0.76 HC-$1.58 Plus Postage
DESCRIPTORS *Bibliographies; *Criterion Referenced Tests

ABSTRACT

This bibliography contains 262 references on Criterion Referenced Measurement (CRM) that were obtained from the following sources: (1) the author's personal files; (2) a bibliography compiled by Hsu and Boston (ERIC Document #ED 068 531) containing 52 references; (3) a bibliography compiled by Keller (ERIC Document #ED 060 041) containing 116 references; and (4) a search of Education Index from July 1971 to September 1975. No attempt has been made to abstract the references reported and they are grouped only by author name. APA bibliography style has been followed as much as possible with some exception occurring when complete reference information on a source was not available. The hope is that this bibliography will serve as an initial reference source for persons involved in or beginning work on CRM. (Author/BJG)

****
* Documents acquired by ERIC include many informal unpublished *
* materials not available from other sources. ERIC makes every effort *
* to obtain the best copy available. Nevertheless, items of marginal *
* reproducibility are often encountered and this affects the quality *
* of the microfiche and hardcopy reproductions ERIC makes available *
* via the ERIC Document Reproduction Service (EDRS). EDRS is not *
* responsible for the quality of the original document. Reproductions *
* supplied by EDRS are the best that can be made from the original. *

Introduction

Criterion-referenced measurement (CRM) is a phrase that has appeared over and over in the titles of such things as journal articles, books, symposium papers, and unpublished papers. So often, in fact, that the compilation of the present bibliography took us way beyond our expectations in terms of number of references available on CRM and left us feeling that many more references are probably still available.

The present bibliography contains 262 references on CRM that were obtained from the following sources:

1) The author's personal files,
2) A bibliography compiled by Hsu and Boston (ERIC Document # ED 068 531) containing 52 references,
3) A bibliography compiled by Keller (ERIC Document # 060 041) containing 116 references, and
4) A search of Education Index from July 1971 to September 1975.

This bibliography did not include a search for references in RIE or CIJE since the CRM articles in those sources are available (with abstracts) by computer search procedures.

No attempt has been made to abstract the references reported and they are grouped only by author name. APA bibliography style has been followed as much as possible with some exceptions occuring when complete reference information on a source was not available. Our hope is that this bibliography will serve as an initial reference source for persons involved in or beginning work on CRM.
